On the window, the user must select or fill the MIS code of the project (1). After entering the MIS code, the user clicks on the search button (lens) to search for a Partner (2). Then the system fills in automatically the Table's S/N (3) indicating the Table S/N for this specific Partner.

Finally, the user fills in the dates in the fields "Period From" to "Period Up to" (4).

Now then, the Table reports a period with incurred/paid expenditure and not a specific month of a year. The period is established by the user taking into account the documentation that will be entered in the system. The payment documentation of the Beneficiary must fall into the period from cell "Period From" to cell "Period Up to". The User can modify the dates "From" to "Up to" when editing the Table.

After entering the above data, the User selects "Accept" (5) and the entry screen appears. If the user clicks on "Close" close the creation of the Table of Expenditure is canceled.

5. The system displays the new entry screen "Table of Expenditure – Create" and pre-fills the "A. General Data" section in the Create pop-up window. The user fills in the beneficiary's full name, as displayed on the figure below.

If the user does not proceed to the "Creation" of a Table (1<sup>st</sup> Save), the system does not enable the option of entering data in the following sections.

## 1.1.1 Section "B. Declared Expenditure based on Supporting Documents"

### A. Overview

The section "B. Declared Expenditure based on supporting documents" consists of two tables, the **Documents** and the **Correlations** tables.

On the Documents table, the User enters both Expenditure (Contractor's documents) and Payments (Beneficiary's documents). Every document is entered on this table **ONLY ONCE.** 

On the Correlations table, the user correlates Expenditure with Payments.

If the Documents (of the Contractor or the Beneficiary) have already been entered in a previous Table of Expenditure, there is no need to re-enter it on the current Table of Expenditure . If it is required tobe used in a correlation, there is a search/entry option on the pop-up "Add Correlation" window (see section C.1 of the present).

On the Documents table, <u>only</u> documents that were entered in the current Table of Expenditure appear. If there is a need to be correlated with documents that were entered in a previous Table, it is possible to search the document on the pop-up 'Add Correlation' window (see Section C.1. herein).

Every Payment document (Beneficiary) and Expenditure document (Contractor) <u>is entered</u> once on the Documents table, even if it is then used for more Correlations.

Expenditure and Payment Documents may be used in one or more correlations on the Correlations Table.

Expenditure and Payment Documents may be used in more than one projects..

The values "Net Amount", "VAT", "Total amount" and "Sub-Contracting amount" may be modified on the Documents table at any moment. If the documents have been correlated, the Correlation Table is also <u>automatically</u> updated after clicking on <u>save</u>.

Section 2.5.1 of the "Application Interface" Manual describes in detail the way to add, edit and delete data on an application table.

- 7. After completing filling in the table, the User selects "Save" HSave from the tool bar (menu).
- 8. When entering the Expenditure document (Contractor) on the Add Document pop-up window, and, more specifically, on the VAT body field, the (VAT) value that the User wishes to select may not be enabled. In such case, he must close the Add Document window and click on the "Add Contractor" +Add Contractor key. On the pop-window that appears, he checks the "Greek VAT" check box, if he wishes to enter a VAT of a Contractor from Greece, otherwise, the check box remains unchecked. The user then enters the VAT, the Tax Office (taxation office) and the rest personal data. Note: In case of a Greek VAT/Body number, the data on the Form may be automatically filled in. The User types the VAT number and then clicks on "Updating data from TAXIS". After he finishes filling in the data, he clicks on "Accept".

The user must first Save the Table of Expenditure in order for the new VAT number to appear on the value list of the VAT field on the pop-up "Add Document" window.

The system returns the Table status to "Submitted". The Beneficiary has no longer the option to edit the "Table of Expenditure" because it has been submitted to the FL controller. While the "Table of Expenditure" is being processed by the FL controller, the Beneficiary can only view the Table of "Expenditure" through "Select-print" menu.

# **1.2 Searching an ETC Table of Expenditures**

Consult the "Application Interface" Manual (Section 2.3) which provides a detailed description of the search menu operation, which is common for all system operations.

1. From the Main Menu of the Electronic System for the monitoring of NSRF Programmes and Projects select the path: (1) ETC  $\rightarrow$  (2) Monitoring  $\rightarrow$  (3) Table of Expenditures (ToE).
